

Emanuela Telescu

Senior QA Automation Engineer / SDET | Playwright, TypeScript & AI-Augmented Testing

Timisoara, Romania | +40 757 017 779 | emanuela.telescu@yahoo.com | linkedin.com/in/emanulatelescu

PROFESSIONAL SUMMARY

Senior QA Engineer with 15+ years in software quality assurance, including 6+ years dedicated to test automation engineering, currently owning test automation strategy for safety-critical embedded products. Led a Cypress-to-Playwright/TypeScript migration and built a Visual Regression Testing framework from scratch, cutting flaky test failures and escaped bugs by 30-40% and full regression execution time by roughly 35%. Over the past ~2 years expanded into AI-augmented and agentic test automation, starting with GitHub Copilot before moving to Claude Code, Playwright MCP and custom Agents/Skills, trimming framework-maintenance and test-authoring time by 27% across two projects. Seeking a remote Senior QA Automation Engineer role in an international product team where AI-augmented testing and end-to-end quality ownership are part of the engineering culture.

CORE COMPETENCIES

- Test Automation Strategy & Architecture
- Playwright & TypeScript
- AI-Augmented Test Automation (Claude Code, MCP)
- API & GraphQL Testing
- Visual Regression Testing
- CI/CD Pipeline Integration
- Cross-Platform Testing (iOS, Android, Web)
- Defect Tracking & Root Cause Analysis
- Agile / Scrum Delivery
- Cross-Functional & Cross-Border Team Collaboration
- Test Planning & Test Case Design
- Security & Penetration Testing QA
- Shift-Left Testing

PROFESSIONAL EXPERIENCE

Senior QA Engineer

BTC Embedded Systems | Romania (Remote) | 12/2022 - Present

- Architected and led the migration of the E2E test suite from Cypress to Playwright/TypeScript, then built a Visual Regression Testing framework from scratch, scaling both across 4 consecutive automotive/HIL product lines and cutting flaky test failures and escaped bugs by 30-40% while reducing full regression execution time by roughly 35%.
- Led the adoption of Claude Code, Playwright Agents/Skills/MCP/CLI and Figma MCP across 2 consecutive projects, building on an earlier GitHub Copilot-based workflow and trimming framework-maintenance and test-authoring time by 27%.
- Architected GraphQL API test coverage using Playwright/TypeScript alongside the existing E2E suites inside CI/CD quality gates, shifting testing left into the development cycle and extending coverage from UI-only to a dual frontend/backend layer, catching roughly 20% more backend-layer defects before release.
- Instrumented distributed-system observability for safety-critical embedded systems using MongoDB, Grafana, OpenLens, Argo and AWS CloudWatch/X-Ray, monitoring and analyzing EC2-hosted service logs to shorten mean time to root cause by an estimated 30%.
- Owned test strategy independently in an Agile/Scrum setup, maintaining on-time delivery across every quarterly release for 4 consecutive years.

Senior QA Engineer

Endava | Romania (Remote) | 06/2021 - 12/2022

- Built and scaled automated regression suites in WebdriverIO/JavaScript and Jest across 2 concurrent enterprise platforms (maritime, insurance), covering 150+ test scenarios and reducing manual regression effort by 25-30%.
- Eliminated test dependency on live third-party services by containerizing execution in Dockerized Ubuntu/WSL/VDI environments with Mountebank API stubbing and Pega orchestration, cutting test failures caused by third-party downtime by an estimated 32%.

Career Note: Break

09/2020 - 05/2021

- Planned personal leave to complete a home construction project; returned to full-time work in May 2021.

Senior QA Engineer

Variston (offensive-security & red-teaming platforms) | Spain (On-site / Remote) | 09/2019 - 09/2020

- Self-built a Java/Selenium automation framework from scratch (Selenium WebDriver, Selenium Grid, JUnit, Maven, IntelliJ) and integrated it into a Jenkins CI/CD server on a Kubernetes pipeline via Zalenium (Selenium Grid with video recording), across Ubuntu and Windows VMware environments, compressing regression cycle time by an estimated 33%.
- Partnered with developers to analyze features, investigate defects, verify fixes and improve stability, using Git, Bitbucket, Jira and Confluence for defect tracking and FireBug, ChroPath and XPath Checker/Finder for element inspection, cutting defect triage time by roughly 25%.
- Designed and executed end-to-end test strategies (smoke, functional, regression, integration, acceptance), translating requirements into test cases and tracking quality metrics across the release lifecycle, contributing to an estimated 25% reduction in defect escape rate.
- Self-studied cybersecurity and penetration testing, applying them to security-focused QA of a Command & Control (C2) red-teaming platform: agent orchestration, HTTP/DNS/SMB protocols, evasion techniques, and Web UI, data-exfiltration and lateral-movement workflows, broadening attack-scenario test coverage by an estimated 30%.
- Tested a modular PHP/ASPX post-exploitation framework, validating multi-stage agent deployment, remote command execution, file manipulation, database interactions, credential-harvesting, persistence and traffic/memory-injection via the C2 interface, surfacing an estimated 22% more critical defects prior to release.
- Performed functional testing of an anonymization platform in an isolated lab, validating VPN/DDNS configuration, user management, distributed anonymous-routing chains and agent deployment control.

Senior QA Engineer

Ness Digital Engineering | Romania (On-site) | 01/2019 - 08/2019

- Engineered a C#/Selenium/SpecFlow/NUnit framework from scratch for Universal Music Group London's global platform, establishing the project's first structured automation layer and cutting manual regression effort by an estimated 30%.
- Extended coverage from UI-only into the Swagger/OpenAPI-validated API layer and ran BrowserStack cross-browser/iOS/Android suites, lowering manual cross-platform testing effort by approximately 35%.
- Owined test planning, estimation and release coordination throughout the engagement.
- Validated web services via token-based authentication against Swagger/OpenAPI contracts, using Fiddler and MSSQL Studio to trace defects to their root cause alongside developers, UI/UX and business analysts.

Lead QA Engineer (promoted from Senior QA Engineer)

IT Vizion | Romania (On-site) | 04/2018 - 01/2019

- Directed the QA team's day-to-day work following the promotion, coordinating test coverage and mentoring testers across releases.
- Rolled out WorkSoft Certify codeless, keyword-driven scripting across the QA team, enabling 35% of non-technical testers to contribute automated coverage for the first time.
- Directed release sign-off within weeks of the promotion, reviewing and agreeing on quality metrics with stakeholders before each release.

Software QA Engineer

Plan.Net Group | Romania (On-site) | 01/2013 - 04/2018

- Built a requirement-based test case library of 300+ scenarios in TestLink from scratch and sustained functional, regression and acceptance coverage across iOS, Android (via Appium) and 5 browser engines.
- Validated pre-release mobile builds through manual exploratory testing on physical devices, using Crashlytics Beta, HockeyApp and Fabric for crash triage, reducing post-release crash reports by around 25%.

Software QA Engineer

12snap | Romania (On-site) | 09/2010 - 01/2013

- Launched the company's first TestLink-based test case library of 100+ scenarios, establishing functional, regression and acceptance coverage for airline and native mobile applications where no QA process existed before and narrowing untracked defect leakage by nearly 20%.

Career Note: Earlier Roles

Romania (On-site) | 08/2000 - 09/2010

- Software/database roles (Toluna, First Emergency Hospital) and infrastructure engineering roles (Iprotim, Halcrow) prior to transitioning into QA in 2010.

EDUCATION

Master of Engineering (MEng), Automotive Embedded Software (Siemens Program)

Politehnica University of Timisoara | 2005 - 2006

Bachelor of Engineering (BE), Computer and Systems Science

University of Oradea | 2000 - 2005

Master of Social Work (MSW), Social Work (pursued part-time alongside full-time employment)

West University of Timisoara | 2010 - 2012

Master of Public Administration (MPA), Public Administration (pursued part-time alongside full-time employment)

West University of Timisoara | 2007 - 2009

CERTIFICATIONS & TRAINING

Selected from 43 professional certifications (full list on LinkedIn):

- Model Context Protocol: Advanced Topics - Anthropic, 2026
- Introduction to Subagents - Anthropic, 2026
- Introduction to Agent Skills - Anthropic, 2026
- Claude Code 101 - Anthropic, 2026
- Advanced Automated Visual Testing - Test Automation University, 2025
- Contract Testing with Pact - Test Automation University, 2025
- Introduction to GraphQL - Great Learning, 2025
- OSF Digital Training Engagement (05/2021 - 06/2021) - Delivered 100 keyword-driven/scripted test cases in Katalon Studio within a live Salesforce Commerce B2B EMEA environment; completed XRay Test Management for Jira certification

LANGUAGES

Romanian: Native

English: Professional Working Proficiency

Italian: Limited Working Proficiency

Spanish: Limited Working Proficiency

TECHNICAL SKILLS

Test Automation & Frameworks: Playwright, Playwright MCP, Cypress, Selenium WebDriver, Selenium Grid, WebdriverIO, Appium, Katalon Studio, WorkSoft Certify

Programming & Scripting: TypeScript, JavaScript, Java, C#

Test Frameworks & BDD: Jest, JUnit, NUnit, Maven, Cucumber, Gherkin, SpecFlow

API & Contract Testing: GraphQL, Postman, Hoppscotch, Swagger/OpenAPI, Pact, Mountebank

CI/CD, Infrastructure & Performance Testing: Jenkins, Docker, Kubernetes, Zalenium, AWS (EC2, Lambda, CloudWatch, X-Ray), Azure, JMeter

Observability & Data: MongoDB, Grafana, OpenLens, Argo

Test Management & Collaboration: Jira, XRay, Confluence, TestRail, TestLink, Git, Bitbucket, BrowserStack

AI & Agentic Tooling: Claude Code, Playwright Agents & Skills, Figma MCP, GitHub Copilot, ChatGPT
