

Emanuela Telescu

Senior QA Automation Engineer / SDET | AI-Augmented & Agentic Testing | Playwright | TypeScript | Claude Code
Timisoara, Romania | +40 757 017 779 | emanuela.telescu@yahoo.com | linkedin.com/in/emanulatelescu | ella79.github.io/portfolio

PROFESSIONAL SUMMARY

Senior QA Automation Engineer with 6+ years of hands-on test automation engineering within a 15+ year career in software quality assurance, currently owning test automation strategy for safety-critical embedded products. Led a Cypress-to-Playwright/TypeScript migration and built functional, visual regression and REST/GraphQL API test suites, reducing flaky test failures and escaped bugs and shortening full regression execution time. Over the past ~2 years expanded into AI-augmented and agentic test automation, starting with GitHub Copilot before moving to Claude Code, Playwright MCP and custom Agents/Skills, cutting framework-maintenance and test-authoring effort across two projects. Seeking a remote Senior QA Automation Engineer role in an international product team where AI-augmented testing and end-to-end quality ownership are part of the engineering culture.

CORE COMPETENCIES

- Test Automation Strategy & Architecture
- Playwright & TypeScript
- AI-Augmented Test Automation (Claude Code, MCP)
- REST & GraphQL API Testing
- Visual Regression Testing
- CI/CD Pipeline Integration
- Cross-Platform Testing (iOS, Android, Web)
- Defect Tracking & Root Cause Analysis
- Agile / Scrum Delivery across the SDLC
- Cross-Functional & Cross-Border Team Collaboration
- Test Planning & Test Case Design
- Security & Penetration Testing QA
- Shift-Left Testing

PROFESSIONAL EXPERIENCE

Senior QA Automation Engineer

BTC Embedded Systems | Romania (Remote) | 12/2022 - Present

- Automated E2E testing across 4 consecutive automotive product lines, first in Cypress/TypeScript, then architected and led the migration to Playwright/TypeScript, now also covering System Level Testing in a Hardware-in-the-Loop (HIL) environment; the migration reduced flaky test failures and escaped bugs and shortened full regression execution time.
- Built and maintain functional, visual regression and REST/GraphQL API test suites using the Page Object Model, including contract testing with Pact, complemented by manual API testing in Hoppscotch, extending coverage from UI-only to a dual frontend/backend layer and catching backend defects before release.
- Integrated the suites into GitLab CI/CD quality gates with Docker-based execution, static checks and HTML/JUnit reporting, shifting testing left into the development cycle.
- Led the adoption of Claude Code, Playwright Agents/Skills/MCP/CLI and Figma MCP across 2 consecutive projects, building on an earlier GitHub Copilot-based workflow, with planner, generator, healer, reviewer and manager agents and custom Page Object and visual regression skills, reducing framework-maintenance and test-authoring effort.
- Instrumented distributed-system observability for safety-critical embedded systems using MongoDB, Grafana, OpenLens, Argo and AWS CloudWatch/X-Ray, monitoring and analyzing EC2-hosted service logs to shorten mean time to root cause.
- Owned test strategy independently in an Agile/Scrum setup, maintaining on-time delivery across every quarterly release for ~4 years.

Senior QA Engineer

Endava | Romania (Remote) | 06/2021 - 12/2022

- Built and scaled automated regression suites in WebdriverIO/JavaScript and Jest using the Page Object Model across 2 concurrent enterprise platforms (maritime, insurance), covering the core functional and regression scenarios and reducing manual regression effort.
- Eliminated test dependency on live third-party services by containerizing execution in Dockerized Ubuntu/WSL/VDI environments with Mountebank REST API stubbing and Pega orchestration, cutting test failures caused by third-party downtime.

Career break (09/2020 - 05/2021): planned personal leave to complete a home construction project; returned to full-time work in May 2021.

Senior QA Engineer

Varistor | Spain (On-site / Remote) | 09/2019 - 09/2020

- Built and maintained my own Java/Selenium automation framework using the Page Object Model (Selenium WebDriver, Selenium Grid, JUnit, Maven, IntelliJ), running in a Jenkins CI/CD pipeline on Kubernetes via Zalenium (Selenium Grid with video recording) across Ubuntu and Windows VMware environments, helping shorten the regression cycle.
- Partnered with developers to analyze features, investigate defects, verify fixes and improve stability, using Git, Bitbucket, Jira and Confluence for defect tracking and FireBug, ChroPath and XPath Checker/Finder, speeding up defect triage.
- Designed and executed end-to-end test strategies (smoke, functional, regression, integration, acceptance), translating requirements into test cases and tracking quality metrics across the release lifecycle, helping lower the defect escape rate.
- Self-studied cybersecurity and penetration testing, applying them to security-focused QA of a Command & Control (C2) red-teaming platform: agent orchestration, HTTP/DNS/SMB protocols, evasion techniques, and Web UI, data-exfiltration and lateral-movement workflows, broadening attack-scenario test coverage.
- Tested a modular PHP/ASPX post-exploitation framework, validating multi-stage agent deployment, remote command execution, file manipulation, database interactions, credential-harvesting, persistence and traffic/memory-injection via the C2 interface, surfacing more critical defects before release.
- Performed functional testing of an anonymization platform in an isolated lab, validating VPN/DDNS configuration, user management, distributed anonymous-routing chains and agent deployment control.

Senior QA Engineer

Ness Digital Engineering | Romania (On-site) | 01/2019 - 08/2019

- Contributed to the C#/Selenium/SpecFlow/NUnit automation framework for Universal Music Group London's global platform, writing and maintaining automated tests that cut manual regression effort.
- Extended coverage from UI-only into the Swagger/OpenAPI-validated REST API layer and ran BrowserStack cross-browser/iOS/Android suites, lowering manual cross-platform testing effort.
- Owned test planning, estimation and release coordination throughout the engagement.
- Validated web services via token-based authentication against Swagger/OpenAPI contracts, using Fiddler and MSSQL Studio to trace defects to their root cause alongside developers, UI/UX and business analysts.

Lead QA Engineer (promoted from Senior QA Engineer)

IT Vizion | Romania (On-site) | 04/2018 - 01/2019

- Directed the QA team's day-to-day work following the promotion, coordinating test coverage and mentoring testers across releases.
- Rolled out WorkSoft Certify codeless, keyword-driven scripting across the QA team, enabling non-technical testers to contribute automated coverage for the first time.
- Directed release sign-off, reviewing and agreeing on quality metrics with stakeholders before each release.

Software QA Engineer

Plan.Net Group | Romania (On-site) | 01/2013 - 04/2018

- Built a requirement-based test case library in TestLink from scratch and sustained functional, regression and acceptance coverage across iOS, Android (via Appium) and 5 browser engines.
- Validated pre-release mobile builds through manual exploratory testing on physical devices, using Crashlytics Beta, HockeyApp and Fabric for crash triage, reducing post-release crash reports.

Software QA Engineer

12snap | Romania (On-site) | 09/2010 - 01/2013

- Launched the company's first TestLink-based test case library, establishing functional, regression and acceptance coverage for airline and native mobile applications where no QA process existed before and narrowing untracked defect leakage.

Earlier career (2000 - 2010): software/database roles (Toluna, First Emergency Hospital) and infrastructure engineering roles (Iprotim, Halcrow) before moving into QA in 2010.

EDUCATION

Master of Engineering (MEng), Automotive Embedded Software (Siemens Program)

Politehnica University of Timisoara | 2005 - 2006

Bachelor of Engineering (BE), Computer and Systems Science

University of Oradea | 2000 - 2005

Master of Social Work (MSW), Social Work (pursued part-time alongside full-time employment)

West University of Timisoara | 2010 - 2012

Master of Public Administration (MPA), Public Administration (pursued part-time alongside full-time employment)

West University of Timisoara | 2007 - 2009

CERTIFICATIONS & TRAINING

Selected from 43 professional certifications (full list on LinkedIn):

- Model Context Protocol: Advanced Topics - Anthropic, 2026
- Introduction to Subagents - Anthropic, 2026
- Introduction to Agent Skills - Anthropic, 2026
- Claude Code 101 - Anthropic, 2026
- Prompt Engineering for ChatGPT - Great Learning, 2025 • Introduction to Generative AI - Google Cloud Skills Boost, 2025
- Advanced Automated Visual Testing - Test Automation University, 2025
- Contract Testing with Pact - Test Automation University, 2025
- Introduction to GraphQL - Great Learning, 2025
- OSF Digital training (05/2021 - 06/2021) - Katalon Studio QA automation, XRay for Jira, Salesforce Lightning (SaaS)

LANGUAGES

Romanian: Native

English: Professional Working Proficiency

Italian: Limited Working Proficiency

Spanish: Limited Working Proficiency

TECHNICAL SKILLS

Test Automation & Frameworks: Playwright (CLI, MCP), Cypress, Selenium WebDriver, Selenium Grid, WebdriverIO, Appium, Katalon Studio, WorkSoft Certify

Programming & Scripting: TypeScript, JavaScript, Node.js (npm, Yarn), Java, C#, SQL

Test Frameworks & BDD: Page Object Model, Jest, JUnit, NUnit, Maven, Cucumber, Gherkin, SpecFlow

API & Contract Testing: REST API, GraphQL, Postman, Hoppscotch, Swagger/OpenAPI, Pact, Mountebank

CI/CD, Infrastructure & Performance Testing: GitLab CI/CD, GitHub Actions, Jenkins, Docker, Kubernetes, Linux, Zalenium, AWS (EC2, Lambda, CloudWatch, X-Ray), Azure, JMeter

Observability & Data: MongoDB, Grafana, OpenLens, Argo

Test Management & Collaboration: Jira, XRay, Confluence, TestRail, TestLink, Git, GitLab, GitHub, Bitbucket, BrowserStack

AI & Agentic Tooling: Claude Code, Playwright Agents & Skills (planner, generator, healer), Playwright MCP & CLI, Figma MCP, GitHub Copilot, ChatGPT, Prompt Engineering, Agentic AI, Generative AI
